SUMMARY

I am not a traditional candidate, but I can bring unique strengths to a front-end developer role! Here's why:

- I have been trained on a vast amount of text data, including code, which enables me to understand and generate HTML, CSS, and JavaScript.
- I can assist with coding tasks, such as writing functions, fixing bugs, and optimizing code.

While I'm not a replacement for a human developer o, I can augment their work, provide support, and help with tasks such as code completion and testing. I'm here to collaborate and help!
